The Significance of Standardization

Standards are the achievement of human civilization's progress. With the advancement of economic globalization, standardization has played an increasingly prominent role in facilitating trade and economic cooperation, advancing industrial development, driving scientific and technological innovation, and enhancing social governance.

Company Profile

- 

Mystuff Group is one of the National Pilot Units for Standardization Services, which is approved by the Standardization Administration of the P.R.C.(SAC) . We are recognized as Specialized, Sophisticated, Distinctive and Innovative SMEs and own five National High-tech Enterprises. Mystuff provides professionally "Standardization +" solutions, such as project drafting, development guidance, polishing translation, publishing and distribution, standard training, publicity and promotion, conformity testing, evaluation and certification, property rights protection of International standards, National standards, National military standards, National vocational skills standards, Industry standards, Local standards and Social organization standards.
- 

Mystuff already has established a high-level Think Tank, which includes more than 1400 experts. Mystuff is able to be competent in various industries, different fields of professional technical services, including standardization consulting, standard system formulation, standard development, standardization pilot (base) construction, standard interconnection, standard implementation application, standard third-party evaluation, standard digitization, standardization intelligent hardware, standardized talent cultivation and NQI one-stop service.
- 

In recent years, Mystuff Group has vigorously implemented the "Sail to the Sea" special action, opened up the second curve, entered the "Strategic mineral resources" and "Humanoid Intelligent Robot" business.

Service Cases

Standardization Consulting

Construction of Work Safety Standardization for Shaanxi Yulin Energy Group Yushen Coal Co., Ltd

Construction of Standardization Pilot for the Specialized Town of Glassware Industry in Qixian

Eye Care Patch Standard

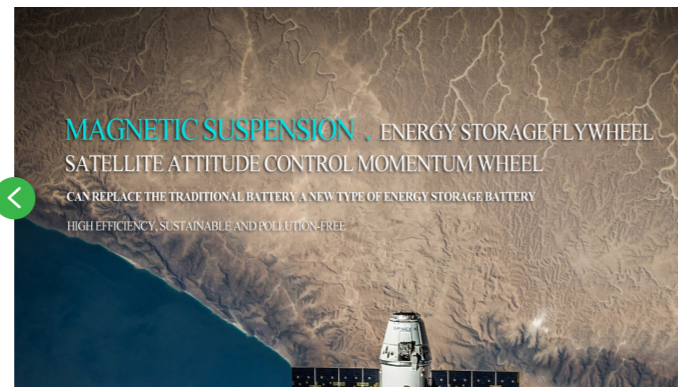

Service Cases

Standard System Formulation and Standard Development

E-commerce Transaction Guarantee for Consumer Final Delivery Services

Beijing Huachi Kinetic Energy Magnetic Levitation Flywheel Energy Storage Group Standard Development Project

Guangxi Pearl Royal National-level Consumer Goods Standardization Pilot

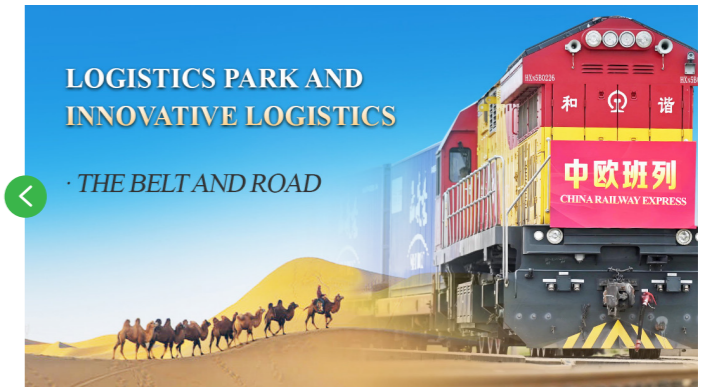

Service Cases

Standard System Formulation and Standard Development

Underground Water-Sealed Cavern for Petroleum Reserve Standard

Logistics Park and Innovative Logistics Standardization

China-Belarus Mutual Recognition Standard Development Service Project — Hydraulic Support for Potash Mines

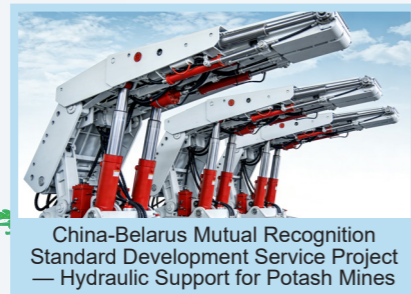

Service Cases

Standard Interconnection and Interoperability

01

Enterprise-Focused Product Overseas Services

- Standard Resource Center
- Standard Comparison and Navigation
- Standard Connectivity
- Standard Technology Dynamic Tracking
- Certification and Testing
- ESG Services

China-Belarus Mutual Recognition Standard Development Service Project — Hydraulic Support for Potash Mines

Belt and Road Standardization Industry Academy

Overseas R&D Center (Middle East)

International Standard Development Service Project — Non-Contact Fiber Optic Intelligent Sleep Health Monitoring Mattress

02

Enterprise-Focused Organization Go Abroad Service

- Strategic Planning and Market Entry
- Operational Localization and Team Building
- Long-Term Growth and Strategic Expansion

03

Government-Focused Industrial Go Abroad Service

- Industrial Planning and Standard Connectivity
- ESG and Sustainable Development System
- Carbon Neutrality Goals and Industrial Upgrading

AI-Driven Enterprise Compliance Platform for Go Abroad Market Access

This platform leverages artificial intelligence to integrate and perform in-depth analysis of multi-source information, including regulatory policies, technical standards, legal documents, TBT/SPS notifications, and news updates. It helps enterprises quickly understand complex export requirements across different countries and regions, enabling real-time insights into evolving technical barriers to trade in overseas markets. The platform offers process optimization recommendations and compliance review support, helping enterprises reduce cross-border risks and improve operational efficiency.

- Automated collection and structured processing of global multi-source heterogeneous compliance data
- Development of domain-specific knowledge graphs for industrial overseas expansion
- Development of AI-powered intelligent compliance diagnosis and dynamic early warning engine

Pilot Program for the Integration of Professional Disciplines and Standardization Education at Yibin University

Service Cases

Military Industry Standardization

Projects of the Commission for Science, Technology and Industry for National Defense

Research on military-civilian integration standardization policies and theories, development strategies, regulatory frameworks, and dynamic tracking and analysis of domestic and international standardization trends.

- Research project on standardization ability of military-related enterprises
- Project on the implementation of quality management standards for military equipment.
- Project on standardization for military equipment testing.
- Research project on the "generalization, serialization and combination" of certain equipment.

Consulting Services for Military Standards

Tracking and consulting services for the entire process of formulation, approval, implementation, and management of national military standards and military industry standards, covering all stages from project establishment to final implementation.

Hong Kong Institute of Standardization Science and Technology Award (First Session)

Hong Kong Institute of Standardization Limited, in collaboration with the Hong Kong Association for Standardization and Science & Technology Evaluation, has established the Hong Kong Institute of Standardization Science and Technology Award (hereinafter referred to as "the Award"). Open to research institutions and science/technology professionals worldwide, the Award recognizes individuals and organizations for outstanding achievements in:

- transformation of scientific and technological outcomes
- standards-driven development
- quality innovation

Award Categories

Award Features

Global Scope: Open to research institutions and science and technology professionals worldwide.

Award Tiers: Each category will present one First Prize, five Second Prizes, and ten Third Prizes.

Award Presentation and Recognition

Winners will receive honorary certificates jointly issued by Hong Kong Institute of Standardization Limited and Hong Kong Association For Standardization And Science & Technology Evaluation.
